Marketing Plugins Recipes

James Maduk
james@wpblogsupport.com

IMPORTANT: I know you want to skip directly to our list of The Best WordPress Plugins – ones that we’ve personally tested and used on thousands of client sites right away. But this list won’t mean much to you if you don’t have ANY idea how to use them with WordPress. You’ll get way more value using any of these Plugins if you watch our FREE WordPress Videos that show you how to use them!

Go Create Your Free Account Now:

Welcome to some of our WordPress Marketing Integrations

What I've done in this PDF is a result of 15 years of Blogging – well before WordPress was even a product.

These WordPress Plugins are the important pieces, the ingredients for our WordPress Marketing Recipes. Think of this as a cookbook, full of different ways you can grow your business and customize your site to do what you need it to do!

Here's just a couple of the Recommended WordPress Marketing Integrations availablein – a far cry from the CRAZY number of free plugins that you'll just on the WordPress.org site. And that's the reason that the list exists, there's just too many confusing and bad choices available today when you have to decide on exactly what WordPress Plugin is the best for....

- Creating a Shopping Cart
- Taking Payments Online
- Selling Event Tickets
- Displaying a Calendar
- Creating a Photo Gallery
- Integrating Social Media
- Creating A Community...

Or whatever else you want your business to do.

So I learned the hard way and it's my turn to share my experiences. My businesses have helped thousands of Bloggers START, BUILD and GROW Online with WordPress so get ready to save time and put an end to the technical frustrations

WordPress eCommerce & Shopping Carts

Paid Memberships Pro:

<http://www.paidmembershipspro.com>

Set up unlimited membership levels and provide restricted access to members-only content (including pages, posts, categories, videos, forums, downloads, support, single "a la carte" page access, and more).

Paid Memberships Pro is flexible enough to fit the needs of almost all online and offline businesses. It works great out of the box, but is easy for developers to customize to fit your needs.

POWERED BY  PaidMembershipsPro

Easy Digital Downloads

<http://www.easydigitaldownloads.com>

Easy Digital Downloads is a complete e-commerce solution for selling digital products in a light, performant, and easy to use plugin. Rather than attempting to provide every feature under the sun, Easy Digital Downloads makes selling digital simple and complete by providing just the features you need.

WooCommerce

<http://www.woocommerce.com>

WooCommerce is a free eCommerce plugin that allows you to sell anything, beautifully. Built to integrate seamlessly with WordPress, WooCommerce is the world's favorite eCommerce solution that gives both store owners and developers complete control.

With endless flexibility and access to hundreds of free and premium WordPress extensions, WooCommerce now powers 30% of all online stores -- more than any other platform.

AffiliateWP

<http://www.affiliatewp.com>

Allows you to set product referral rates on a per-affiliate level in AffiliateWP.

At its most basic level AffiliateWP allows you to set a global referral rate which all affiliates share. For integrations that support per-product referral rates, affiliates can earn different commissions based on which product/s are purchased. AffiliateWP also allows you to set referral rates on a per-affiliate level which will override any per-product referral rate.

Affiliate Product Rates expands this even further, allowing different per-product referral rates on a per-affiliate level.

Here are some examples of how you might use this plugin:

1. Give Affiliate X 10% commission for Product A, 80% commission for Product B, and a flat rate of \$50 for Product C.
2. Give Affiliate Y 50% commission for Product A, but a lower commission than Affiliate X for Products B and C.
3. Give Affiliate Z a flat-rate of \$10 commission for Product A, 65% commission for Product B and 22% commission for Product C.

The possibilities are endless! You can also set per-product referral rates per-affiliate per-integration!

WordPress Content and Presentation Plugins

LearnDash

<http://www.learndash.com>

The WordPress LMS: Flexible Learning Management

The LearnDash plugin takes cutting edge elearning methodology and infuses it into WordPress. More than just a plugin, LearnDash provides practical and experience driven guidance for individuals and organizations interested in setting up online courses.

In Post Ads

<https://wordpress.org/plugins/insert-post-ads/>

Build a premium marketing strategy that makes the most of your content. Mix advertisements with post and page content to drastically improve sales.

Content Aware Sidebars

<https://wordpress.org/plugins/content-aware-sidebars/>

Manage an infinite number of sidebars. Boost on-site SEO with better Calls to Action by controlling what content or context your sidebars should be displayed with. The sidebar manager makes it incredibly easy for anyone to create dynamic, custom sidebars without the need of code.

The screenshot displays the 'Edit Sidebar' interface of the Content Aware Sidebars plugin. At the top, a green notification bar states 'Condition group saved'. The main title is 'Edit Sidebar' with an 'Add New' button. Below the title, the sidebar name is 'Very Categorized Posts' and the support text is 'Support the Author of Content Aware Sidebars'. A left-hand menu lists various content types: Static Pages, Posts, Pages, Media, Authors, Page Templates, Categories, Tags, and Format. The 'Condition Groups' section contains instructions and a list of content types to display the sidebar with: 'Posts' (with 'All Posts' checked) and 'Categories' (with 'Very Categorized' checked). There are 'Save' and 'Cancel' buttons for this selection. On the right, the 'Publish' section shows the status as 'Draft' and options to 'Move to Trash' or 'Publish'. Below that, the 'Options' section includes 'Exposure' (set to 'Singular & Archive'), 'Handle' (set to 'Replace' and 'Main Sidebar'), and 'Merge position' (set to 'Bottom').

Editorial Calendar

<https://wordpress.org/plugins/editorial-calendar/>

Calendar The Editorial Calendar makes it possible to see all your posts and drag and drop them to manage your blog.

Tawk-To Live Chat

<https://wordpress.org/plugins/tawkto-live-chat/>

tawk.to is a free live chat app that lets you monitor and chat with visitors on your website or from a free customizable page. No catch. No spam. No wares. It's truly free and always will be.

WP Mail SMTP

<https://wordpress.org/plugins/wp-mail-smtp/>

This plugin reconfigures the `wp_mail()` function to use SMTP instead of `mail()` and creates an options page that allows you to specify various options.

The screenshot shows the 'Advanced Email Options' page of the WP Mail SMTP plugin. The left sidebar contains the WordPress dashboard menu with 'Settings' expanded to 'Email'. The main content area has a title 'Advanced Email Options' and a 'Help' button. Below the title is an 'Update Options' button. The 'From' section has two fields: 'From Email' (wp@chmac.com) and 'From Name' (Callum WP), both with explanatory text. The 'Mailer' section has two radio buttons: 'Send all WordPress emails via SMTP.' (selected) and 'Use the PHP mail() function to send emails.' The 'SMTP Options' section includes 'SMTP Host' (smtp.gmail.com), 'SMTP Port' (465), and 'Encryption' (SSL selected). The 'Authentication' section has 'Yes: Use SMTP authentication.' selected. Below are 'Username' and 'Password' fields. At the bottom is a 'Send a Test Email' section with a 'To:' field and a 'Send Test' button.

Contact Form 7

<https://wordpress.org/plugins/contact-form-7/>

Just another contact form plugin. Simple but flexible.

The screenshot shows the 'Edit Contact Form' interface for 'Contact form 1'. On the left is a sidebar menu with options like Dashboard, Posts, Media, Pages, Comments, Contact (selected), Contact Forms, Appearance, Plugins, Users, Tools, Settings, and Collapse menu. The main area has tabs for 'Form', 'Mail', 'Messages', and 'Additional Settings'. The 'Form' tab is active, showing a text editor with the following HTML code:

```
<p>Your Name (required)<br />
[text* your-name] </p>

<p>Your Email (required)<br />
[email* your-email] </p>

<p>Subject<br />
[text your-subject] </p>

<p>Your Message<br />
[textarea your-message] </p>

<p>[submit "Send"]</p>
```

Below the text editor are buttons for various form elements: text, email, URL, tel, number, date, text area, drop-down menu, checkboxes, radio buttons, acceptance, quiz, CAPTCHA, file, and submit. On the right side, there are sections for 'Status' (with a 'Duplicate' button), 'Delete' (with a 'Save' button), and 'Information' (with links for Docs, FAQ, and Support).

Social Media Widget by Acurax (aka Acurax Social Media Widget)

<https://wordpress.org/plugins/acurax-social-media-widget/>

Newsletter

<https://wordpress.org/plugins/newsletter/>

The Newsletter plugin has an extensive set of options for who want to configure it even to the finest detail but it usually works greatly out of the box.

WordPress Traffic Tools

Yoast SEO

<https://wordpress.org/plugins/wordpress-seo/>

The first true all-in-one SEO solution for WordPress, including on-page content analysis, XML sitemaps and much more.

The screenshot displays the 'WordPress SEO by Yoast' interface. At the top, there are four tabs: 'General', 'Page Analysis' (which is selected), 'Advanced', and 'Social'. Below the tabs, a yellow box contains the instruction: 'To update this page analysis, save as draft or update and check this tab again.' Below this, a list of 11 items is shown, each with a green circular icon and a text description of an SEO analysis point. The items are: 1. The keyword / phrase does not appear in the URL for this page. If you decide to rename the URL be sure to check the old URL 301 redirects to the new one! 2. No outbound links appear in this page, consider adding some as appropriate. 3. The copy scores 62 in the [Flesch Reading Ease](#) test, which is considered OK to read. 4. The images on this page contain alt tags with the target keyword / phrase. 5. The keyword appears in the first paragraph of the copy. 6. Keyword / keyphrase appears in 1 (out of 12) subheadings in the copy. While not a major ranking factor, this is beneficial. 7. The keyword density is 1.34%, which is great, the keyword was found 13 times. 8. The page title contains keyword / phrase, at the beginning which is considered to improve rankings. 9. In the specified meta description, consider: How does it compare to the competition? Could it be made more appealing? 10. The meta description contains the primary keyword / phrase. 11. There are 976 words contained in the body copy, this is greater than the 300 word recommended minimum. 12. The page title is more than 40 characters and less than the recommended 70 character limit.

Google Analytics by Yoast

<https://wordpress.org/plugins/google-analytics-for-wordpress/>

Track your WordPress site easily with the latest tracking codes and lots added data for search result pages and error pages.

Yoast Google Analytics: Settings

General Universal Advanced Debug mode

General settings

Analytics profile:
yoast.com RAW (UA-317889-17) Re-authenticate with your Google account

☐ Manually enter your UA code

Track outbound click & downloads: ☒

Clicks & downloads will be tracked as events, you can find these under Content » Event Tracking in your Google Analytics reports.

Allow tracking of anonymous data: ☐

By allowing us to track anonymous data we can better help you, because we know with which WordPress configurations, themes and plugins we should test. No personal data will be submitted.

Anonymize IP's: ☐

This adds `_anonymizeIp`, telling Google Analytics to anonymize the information sent by the tracker objects by removing the last octet of the IP address prior to its storage.

Ignore users: Administrator ✕ Editor ✕ Author ✕

Hint: Select multiple roles by using CTRL or CMD. Users of the role you select and higher will be ignored, so if you select Editor, all Editors and Administrators will be ignored.

All In One SEO

<https://wordpress.org/plugins/all-in-one-seo-pack/>

All in One SEO Pack is a WordPress SEO plugin to automatically optimize your WordPress blog for Search Engines such as Google.

The screenshot shows the WordPress dashboard with the 'All in One SEO' menu item highlighted. The 'All in One SEO Pack Pro Plugin Options' page is open, displaying three main sections: General Settings, Home Page Settings, and Keyword Settings. The General Settings section includes fields for a License Key (8L197744BV7032216), Canonical URLs (checked), Use Original Title (Enabled), and Log Important events (unchecked). The Home Page Settings section includes fields for Home Title (The home of Steve Mortiboy on the interwebs), Home Description, and Home Keywords (comma separated). The Keyword Settings section includes checkboxes for Use Keywords (Enabled), Use Categories for META keywords (unchecked), Use Tags for META keywords (checked), and Dynamically Generate Keywords for Posts Page (checked). On the right side of the dashboard, there is an 'About' section for the plugin, version 2.0.5, which includes a link to the Support Forum, a mailing list sign-up form, and a 'Follow me on Twitter' button.

Scroll Triggered Box

<https://wordpress.org/plugins/dreamgrow-scroll-triggered-box/>

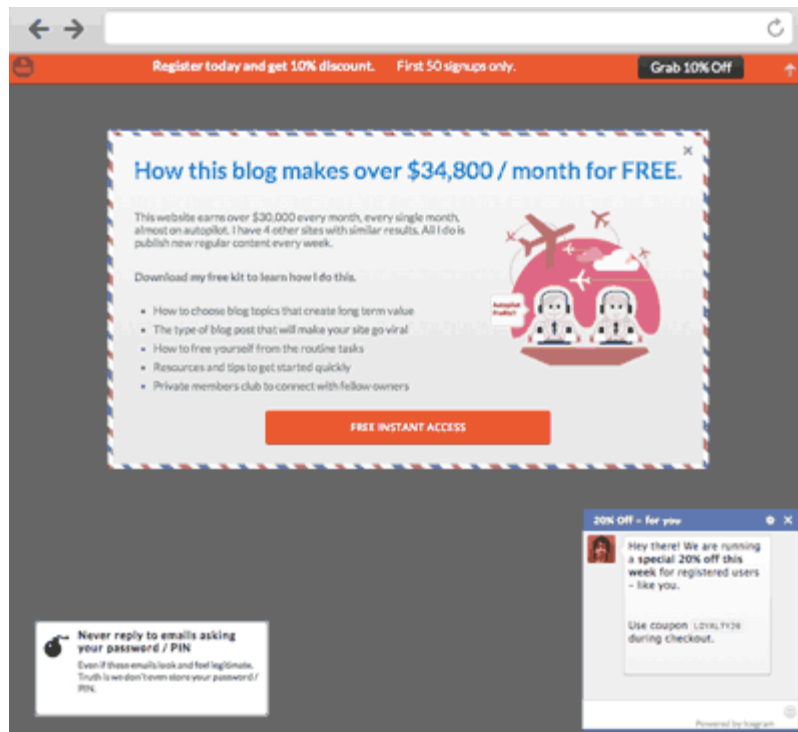

Scroll Triggered Boxes is a lightweight plugin for adding flexible call-to-actions to your WordPress site. Boxes can slide or fade in at any point and can contain whatever content you like.

ICEGRAM

<https://wordpress.org/plugins/icegram/>

Popup windows, floating action bars, messengers, toast notifications and more. Capture leads, optins and grab visitor's attention. All in one solution.

WP Rocket

<http://wp-rocket.me/>

WP Rocket is a caching and performance optimization plugin to improve the loading speed of WordPress websites. WP Rocket integrates all the latest features in terms of performance: deferred loading of images and JavaScript, minification of HTML code, concatenation and minification of CSS and JavaScript files. While being extremely complete, WP Rocket is also very simple to configure even for beginners.

Theme My Login

<https://wordpress.org/plugins/theme-my-login/>

This plugin themes the WordPress login, registration and forgot password pages according to your current theme. It creates a page to use in place of wp-login.php, using a page template from your theme. Also includes a widget for sidebar login.

The image shows the default WordPress login page. At the top is the WordPress logo and the word "WORDPRESS" in a large, blue, serif font. Below this is a white login box with rounded corners. Inside the box, there are two input fields: "Username" and "Password". Below the "Password" field is a checkbox labeled "Remember Me". To the right of the checkbox is a blue "Log In" button. Below the login box is a link that says "Lost your password?".

Postie

<https://wordpress.org/plugins/postie/>

Postie allows you to create posts via email, including many advanced features not found in WordPress. It's easy to configure your e-mail settings and provides tons of posting options.

The screenshot shows the 'Mailserver' configuration page for the Postie plugin. The page has a navigation bar with links: Mailserver, User, Message, Image, Video and Audio, Attachments, Help, and FAQ. The configuration options are as follows:

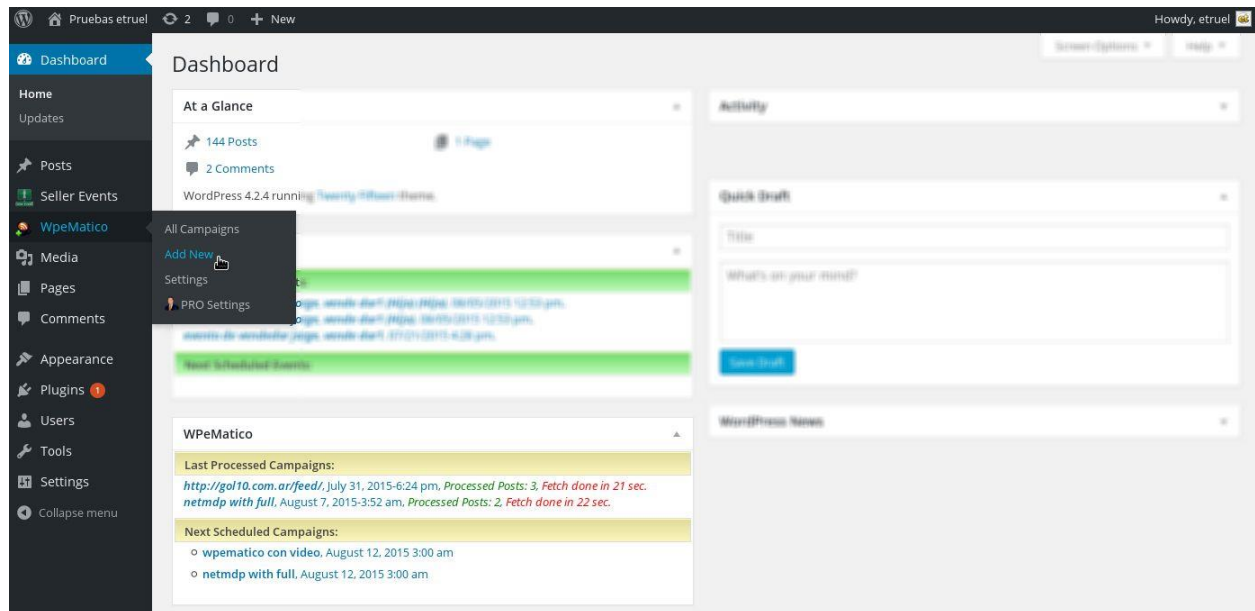

- Mail Protocol:** A dropdown menu set to 'POP3'.
- Use Transport Layer Security (TLS):** A dropdown menu set to 'No'. Below it, a note says 'Choose Yes if your server requires TLS'.
- Port:** A text input field containing '110'. To the left, a list of 'Standard Ports' is shown: POP3 - 110, IMAP - 143, IMAP-SSL - 993, and POP3-SSL - 995.
- Mail Server:** An empty text input field.
- Mail Userid:** An empty text input field.
- Mail Password:** An empty text input field.
- Postie Time Correction:** A dropdown menu set to '-7' followed by the text 'hours'. Below it, a note says 'Should be the same as your normal offset, but this lets you adjust it in cases where that doesn't work.'
- Check for mail every:** A dropdown menu set to 'check manually'.
- Maximum number of emails to process:** A dropdown menu set to 'All'.
- Delete email after posting:** A dropdown menu set to 'Yes'. Below it, a note says 'Only set to no for testing purposes'.

At the bottom left, there is a blue button labeled 'Save Changes'.

Wpematico

<https://wordpress.org/plugins/wpematico/>

Enables administrators to automatically create templated posts from from RSS and syndicated feeds with multiples filters.

Safe Redirect Plugin

<https://wordpress.org/plugins/safe-redirect-manager/>

Redirect Pages, Posts or Custom Post Types to another location quickly (for internal or external URLs). Includes individual post/page options, redirects for Custom Post types, non-existent 301 Quick Redirects (helpful for sites converted to WordPress), New Window functionality, and rel=nofollow functionality.

All 404 Redirect to Home Page

<https://wordpress.org/plugins/all-404-redirect-to-homepage/>

Permanently redirect all 404's to the main blog URL. The primary purpose is to salvage Google PageRank (TM) from missing pages.
